99/00 Totals

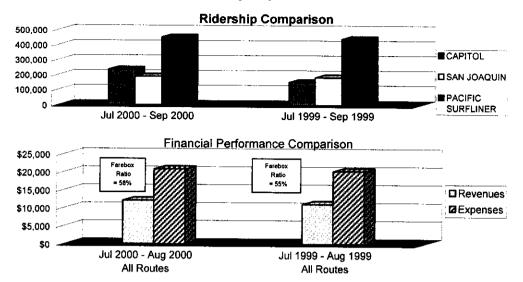

<sup>\*</sup> Includes State-supported and Amtrak (basic system) share of all trains

<sup>\*\*</sup> Total Farebox (revenue/expense) Ratio is the average for all three corridors

<sup>#</sup> Reflects combination of projections for Federal Fiscal Year 1998-99 (for July-September) and Federal Fiscal Year 1999-00 (for October - June 2000)

# INTERCITY RAIL CTC Quarterly Report - Q1 FY 00/01

The strong spring travel carried over into summer, and the Pacific Surfliners carried 453,000 riders in the first quarter of the 2000/01 Fiscal Year, an increase of 2.4 percent over the same period the prior year. Ridership continued to lag behind the Business Plan projection, but the shortfall closed to within one percent (0.6%). The route continues to be the second-busiest in the Amtrak system. Two additional sets of new bi-level Surfliner cars entered service during the quarter, again replacing older single-level equipment, and the fourth set of new cars came on line October 2nd. Half the service in the corridor is now being operated with new equipment.

The San Joaquins continued to gain riders during the summer, and total ridership for the first quarter of the 2000/01 Fiscal Year almost reached 190,000, an increase of 2.6 percent over the same period the prior year. Ridership for the quarter exceeded the Business Plan projection by two percent. Significantly, first quarter ridership on the Sacramento trains (the fifth round trip) increased by 15.4 percent from last year to this year.

Revenues for the first two months of the Fiscal Year (July and August) on the two State-administered routes were significantly higher this year than last, increasing at more than double the rate of the ridership increases (5.0% for the Pacific Surfliners and 10.4% for the San Joaquins). Coupled with favorable changes in operating expenses, this yielded a four point improvement in the fare-box ratio on each route. On both routes the actual fare-box ratios exceeded the Business Plan projections.

The February 2000 service expansion in the Capitol Corridor provided seven daily round trips this summer (compared to six round trips the previous summer), with four round trips instead of three extending to San Jose. As a result, ridership on the Capitols in the first quarter of Fiscal Year 2000/01 increased by 54.8 percent over the same quarter the prior year. Much of this increase continues to come from growth in regular short-distance riders (nearly 42 percent of riders are using multi-ride tickets, up from 37 percent just in the previous quarter), and revenues for July and August 2000 increased by only 22.3 percent over the same two months last year. Expenses for July and August increased by 8.9 percent over the same months last year, and the fare-box ratio increased by almost five points in the same period.

#### **BUDGETS PROGRAM**

# CTC Quarterly Report - Q1 FY 00/01 Appropriation vs. Program/Allocation

Objective: To identify the uncommitted State and Federal 2000/2001 Budget Authority

as a means of gauging the impact of proposed policy decisions or the

capacity to advance and amend projects into the 2000/2001 Program Year.

Measure: The appropriation level is consistent with the enacted 2000/2001 Budget.

Allocations represent CTC votes, emergency project funding (G-11) and project allocations processed under the Department's delegated authority.

Result: Currently, sufficient Budget Authority exists to fund the current program

levels. However, the Department has the option to exercise its authority to realign the appropriations between programs should

the need arise in the future.

#### Background:

I Due to the timing of the Governor's Budget development, appropriation levels are built nine months prior to the enactment of the budget, as such discrepancies between the appropriation and program will exist.

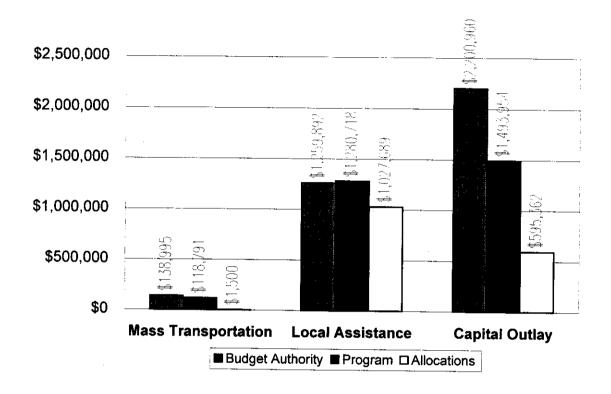

- I The 2000/2001 appropriation is based upon the 1998 STIP and SHOPP Program levels as of October 1998 plus a contingency for potential project advancement and emergency projects. The reported program levels are a point in time measurement and subject to change on a monthly basis due to project amendments and deletions. The Department, with Commission approval, has the authority to realign its budget to reflect changes in program levels. At the end of the fiscal year, planned reservation of budget authority is required to fund potential cost overruns, project granted a waiver by the Commission, etc. Unused authority will revert to the fund of origin to be used in future budgets.
- I Allocations represent project specific votes net of savings and/or cost increases (G-12), "lump sum" allocations to fund specific activities (Right of Way, Direct Subventions), and emergency project funding.

### **BUDGETS PROGRAM**

### CTC Quarterly Report - Q1 FY 00/01

# 2000/2001 Appropriation vs. Program/Allocation

### Analysis:

- For Capital Outlay, Right-of-Way programmed and allocation amounts include \$54.5 million for state and \$140.5 million for federal, for a total Right-of-Way of \$195 million.
- For Local Assistance, the lump sum subvention amount of \$952 million has been factored into the budgeted, programmed, and allocation amounts.
- For the FY 2000/01, the metholology for determining the programmed amounts has changed to better mirror the California Transportation Improvement Program System (CTIPS) database, which lists programmed projects by fiscal year.

|------------------------------------|----------|

#### Note:

(1) 100% funded by MTA - (MTA not contributing money) In addition, MTA has not contributed funds on several projects, including 07-007604 (approx. \$2.5 million). Contingency balance of corridor fund:

| Original contingency fund balance | 23,261  |
|-----------------------------------|---------|
| Dollars paid from fund            | 20,138  |
| Balance of contingency fund       | \$3,123 |

### 1st Quarter 2000/2001 Fiscal Year

# Environmental Phase Projects Delayed Outside Planned Year

|          |           |       |      | Type of<br>Environmental                  |   |   |
|----------|-----------|-------|------|---|---|---|
| District | County    | Route | PM   | Document                                  | Project Description   | Reason for Environmental Delay  |
| 8        | Riverside | 91    | 0.9  | Negative<br>Declaration                   | Reconstruct IC & Construct<br>Auxiliary Lane                            | TCRP Project. PAED delayed from 0-1 year to 1-2 year, however delivery date in 3-4 year will be kept.   |
| 10       | Merced    | 99    |      | Negative<br>Declaration &<br>Reevaluation | Convert 4 In Expressway to 6 In freeway with 8 In freeway right of way. | Determination was made to use Negative Declaration that was done several years ago. Prior to approving project report, an environmental reevaluation will be conducted to reinforce studies conducted previously. PAED will move to the 1-2 year, however delivery is planned for the 2-3 year and is expected to be met, 1 year in advance of the programmed year. |
| 11       | Imperial  | 98    | 30.8 | Negative<br>Declaration                   | Widen freeway   | PAED support only project. Project was originally planned as a SHOPP project (E.A. 11-15785) and was to have been a categorically exempt project. With the addition of IIP funds, the scope has been revised, a Negative Declaration will be required which has delayed the PAED planned date.  |
